### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:
2. The 35 USC 103 rejection based on Lickfield et al. (5,484,645) in view of Tabor et al. (5,372,885) is withdrawn since Tabor discloses that the polyethylene blend is made with grafted high density polyethylene (HDPE) which is excluded by the present claims since it is not a HDPE homopolymer as discussed in the Applicant's remarks (Response, page 2).
3. The prior art fails to teach or fairly suggest a spunbond fabric made from a multi-component fiber with a polyethylene component comprising a blend of linear low density polyethylene (LLDPE) copolymer consisting of ethylene copolymerized with minor amounts of an  $\alpha$ -olefin having 3 to 12 carbon atoms and a HDPE homopolymer, where the HDPE component is present in an amount greater than 50 weight percent. While the prior art does teach that LLDPE can be blended with other components such as HDPE, the HDPE is either grafted to improve the bonding characteristics of the material or the HDPE is added in minor amount. Another reference, Krupp et al. (4,990,204) discloses a spunbond fabric 50/ 50 blend of HDPE and LLDPE (Example 3), but provides no motivation to use the blended material as one component in a multicomponent fibers. Therefore, claims 1 – 29 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
